► GUTTERS & DOWNSPOUTS

Repla-K Gutter & Downspout

Tired of bent or dented aluminum and galvanized gutters?

Then it's definitely time to switch to Genova's Repla-K Gutter and Downspout System. Rugged yet flexible PVC construction emulates the traditional look of most metal gutter systems but with modern day, durable material. Step on it, lean a ladder against it and it just "bounces back" to its original shape, something you can't do with metal gutters.

Truly a "traditional" look, Genova's Repla-K hidden bracket system gives the street side viewer the look of a true seamless gutter installation. Each section is joined by a solvent welded connector and each drop outlet allows for system expansion and contraction. Genova's DuraSpout downspout system completes the installation with the traditional 2" x 3" fluted downspout design.

In fact Genova's Repla-K gutter and downspout system so closely resembles traditional systems, it can be adapted to work with existing 5" galvanized and aluminum gutter systems, great when only a piece of gutter or downspout needs to be replaced.

Genova's Repla-K gutter and downspout for the discriminating homeowner installs quickly and easily and will make any homeowner proud!

10 FT WHITE GUTTER: 572560, FAC: AW100

DOWNSPOUT: HH387001, TW565127, FAC: AW200

The Do-it-Yourselfer's dream with easy snap together fittings for a quick and easy installation.

Joints snap together for a leak resistant seal. The neoprene double-lip seal allows for normal expansion and contraction but resists leakage with a tight compression seal. Guaranteed not to warp, rot or fade Genova's Raingo gutter and downspout system is a proven performer for even the harshest of climates. Tough PVC material is designed to withstand cold winter temperatures and the harsh summer sun without fail! Patented Raingo Ridges lift ice and debris off the bottom of the gutter to allow water to drain along the bottom. Handy under-mount brackets screw directly into the fascia board and do not obstruct gutter opening so cleaning the gutters is really a snap! Imagine, no more spike and ferrule obstructions every couple of feet to get in the way!

► LATTICE

Quality plastic lattice from Genova is the perfect answer to backyard landscaping challenges, whether you want to add privacy or "hide" garden tools or storage areas.

Lattice is easy to cut, nail or screw, so even the rookie do-it-yourselfer can make their project look professional.

Lattice sheets are made of solid colored material so any nicks and scratches won't show. Plastic lattice is unaffected by moisture and will never rust, rot or corrode. UV stabilized material is fade and crack resistant, as well as virtually maintenance free.

Standard lattice opening provides basic "screening" for decks or porches, and the smaller opening "privacy" lattice can be used to screen the trash cans, air conditioner or pool filter.

Big Buddy Indoor-Safe Propane Heater

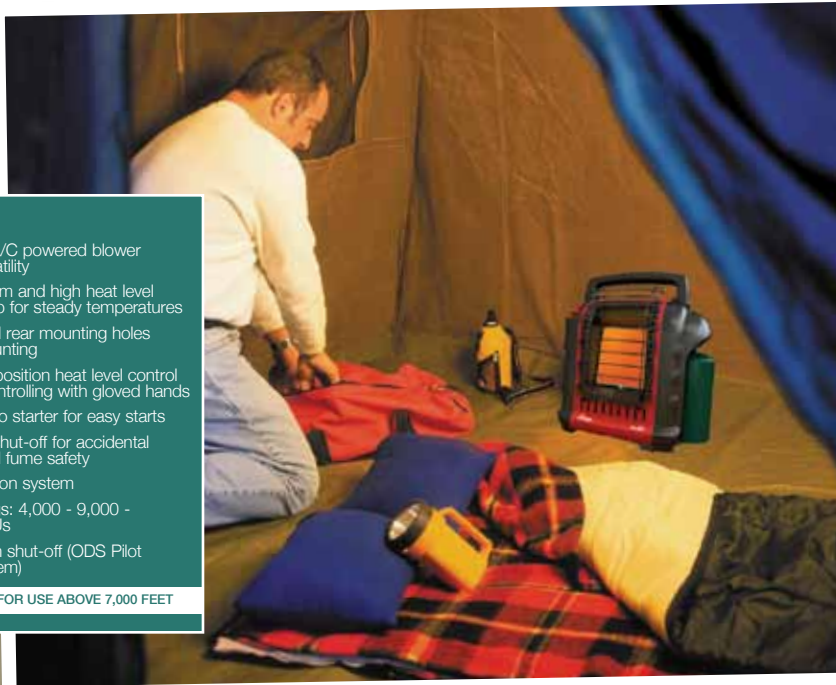

With its newly integrated hot air blowing system, the Big Buddy Heater now takes portable heating to a new level. Ideal for use indoors, the safe Big Buddy Heater features an automatic low-oxygen shut-off system that automatically turns the unit off before carbon monoxide fumes reach dangerous levels in your tent, camper or garage. This portable wonder blasts out 18,000 BTUs, and can heat up to 400 square feet of space for up to 220 hours on one tank with the thermostat on low. A blower fan can be powered by four size D batteries or an A/C Adaptor. Multi-position heat settings keep the room at just the right temperature so you're never alternating between too hot and too cold.
